10.6 Density and Dimensional Standards

The following table illustrates the dimensional standards that apply in the Village of Agua Fria Zoning District. Measurements and exceptions to the standards of this schedule are listed in the table notes.

Commentary: The density and dimensional standards set forth in this section are not a guarantee that stated development density and intensities can be attained. Other factors—water and other public facility availability, infrastructure capacity, building layout, physical limitations, and parking configuration to name a few—may have the effect of limiting development intensity more than the stated standards.

AFLDUZ	2.5	2.5			1	1	0.5		20	24	24	24	0	20	20

Notes:

(1) Where adequate water is available, minimum lot area may be reduced by employing water conservation measures and reducing water use. Further reductions may be achieved by submitting proof of adequate long term water availability, connecting to community water, community sewer or both (W&S), all in accordance with Article III, Section 10, Lot Size Requirements of the Code or, such additional density bonus and lot size provisions of County Ordinance 2006-02, Affordable Housing.
